SUMMARY

Motivated web developer with experience in building dynamic web applications using HTML, CSS, JavaScript, Node.js, Express, and MongoDB. Worked on projects involving authentication, dashboard creation, and database integration. Comfortable developing responsive interfaces and connecting frontend with backend services. Interested in learning new technologies and building practical, user-focused solutions.

EXPERIENCE

Edunet Foundation — *Full Stack Web Developer Intern* *June 2025 – August 2025*

- Developed responsive web applications using **HTML, CSS, JavaScript, Node.js, and Express.js**, implementing RESTful APIs and dynamic UI components.
- Designed and managed databases with **MongoDB**, performing CRUD operations and integrating secure authentication (email verification with OTP).
- Participated in code reviews and agile workflows, debugging and optimizing application performance across full-stack features.

PROJECTS

Elder Care Support Portal *HTML, CSS, Express js, Node js, MongoDB*

- Developed a full-stack support platform enabling elderly users to register, log in with OTP-based email verification, and post service requests in real time.
- Implemented **role-based access control** for elders and volunteers with request tracking, accept/decline actions, task completion updates, and a volunteer badge system.
- Built secure authentication using **SendGrid API** and integrated **MongoDB** for efficient data management and CRUD operations.

Smart Crop Advisory System *Python, Flask, scikit-learn, Pandas, OpenWeatherMap API*

- Built a full-stack web application using **Flask** that recommends optimal crops based on soil parameters (N, P, K, pH) and real-time weather data fetched via **OpenWeatherMap API**.
- Trained a **Random Forest Classifier** on a Kaggle dataset of 2,200+ records across 22 crop types, with StandardScaler-based feature normalization using scikit-learn.
- Implemented dual recommendation modes: manual soil input and **city-based live weather integration**, returning top-3 crop predictions with confidence probabilities.
- Designed multi-page frontend with HTML/CSS templates, dynamic result rendering, and visualizations (confusion matrix, feature importance) using **Matplotlib and Seaborn**.

EDUCATION

2024 - 2028	Bachelor of Technology in Computer Science at SRM University AP	(CGPA: 7.9/10)
2022 - 2024	Class 12th (ISC) at Loyola Public School	(375/500)
2021 - 2022	Class 10th (ICSE) at Loyola Public School	(480/600)

SKILLS

- Programming Languages:** C++, Java, C, Python, SQL
- Web Development:** HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, React.js (Familiar)
- Machine Learning & Data:** scikit-learn, pandas, NumPy, Matplotlib, Seaborn, Random Forest, REST APIs
- Tools & Concepts:** Git, GitHub, Flask, DSA, OOP, CRUD Operations, Agile Workflows

CERTIFICATIONS

- Full Stack Web Development**– Edunet Foundation Internship
